Making the internet a better place where all experiences are fast, safe, and engaging.

In 2017...

Oh No! Repetitive Strain Injury (RSI)

Voice Coding

Demo

What Is Talon?

- Hands-free input
- Windows/Mac/Linux
- Ships with speech recognition engine!
- Programmatically configured
- Free!
- https://www.patreon.com/lunixbochs

Conference Talks in 2019

- [The Perl Conference](#)
- [Deconstruct](#)
- [Strange Loop](#)
- [Velocity Conference](#)

Reflection

Chronic injuries are difficult to heal. There is no "quick fix".

Disability can be fluid.

Voice Coding today is even better! Still a steep learning curve.

I had no reason to think I was going to be in this situation.

Many accessibility features that were good for me were also good for others!

Getting accessibility issues addressed is really time consuming and difficult to get prioritized.

Sometimes the solutions are fancy; sometimes they are simple.

Design the world that would include you if you find yourself someday limited by your body.

Thank You!
